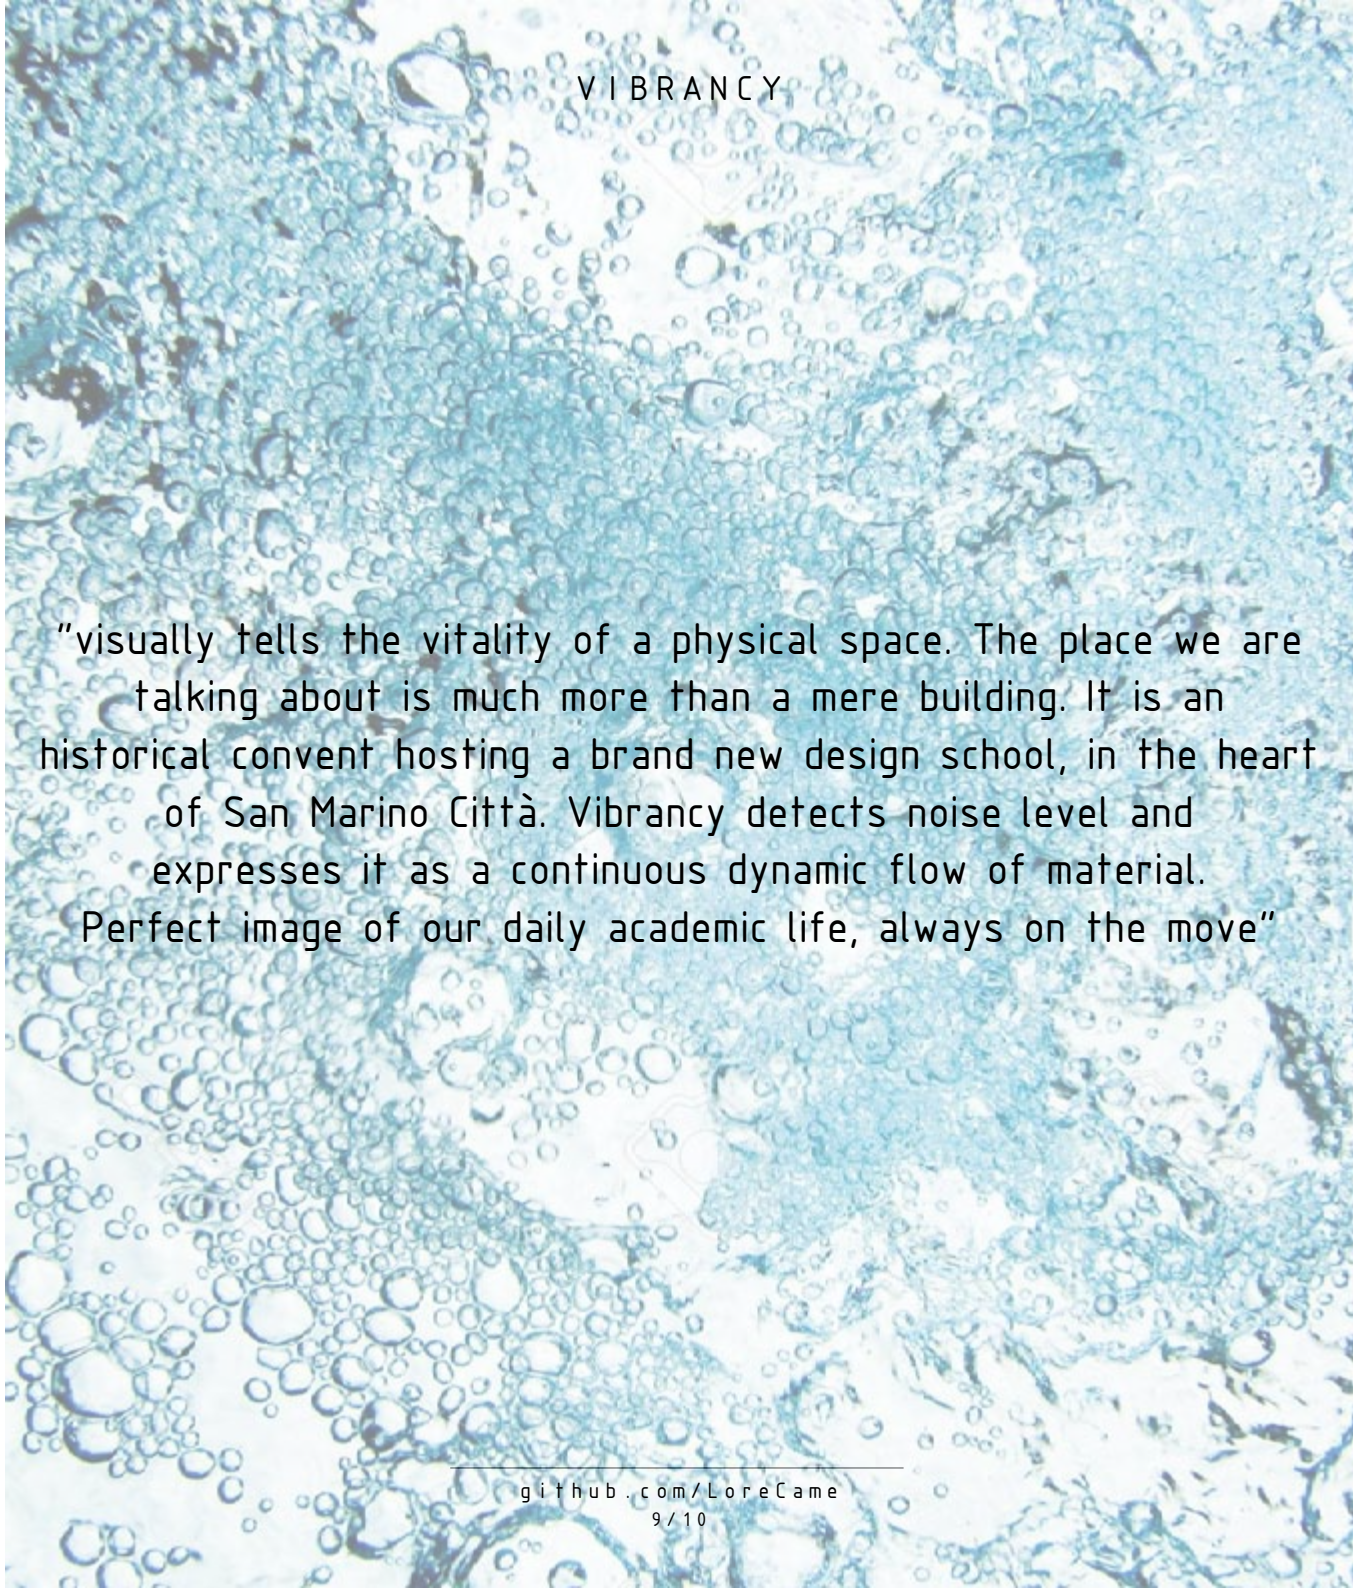
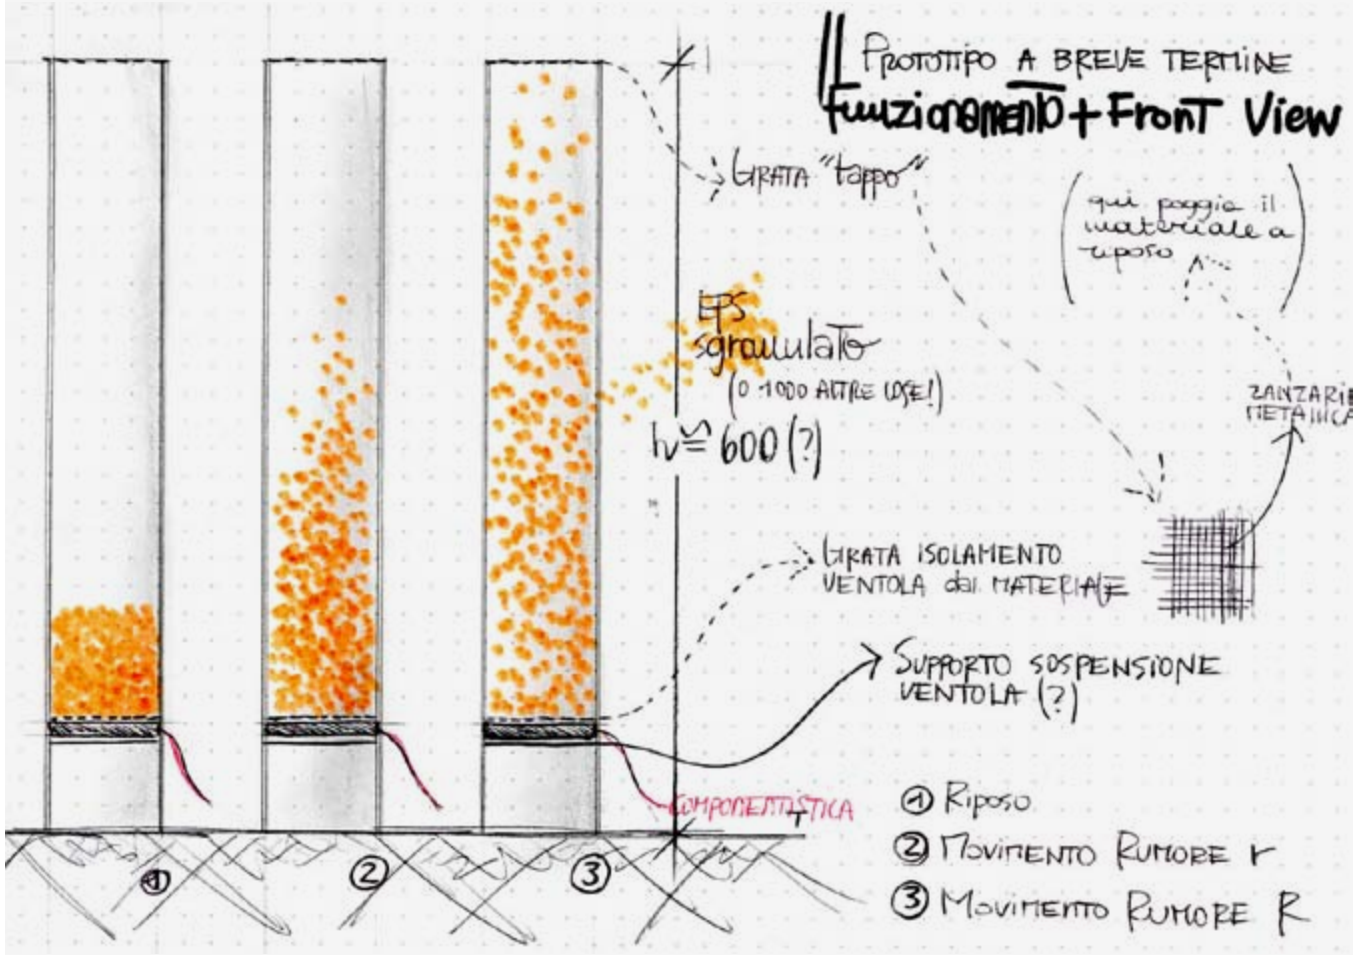
seek meaning, make sense



"visually tells the vitality of a physical space. The place we are talking about is much more than a mere building. It is an historical convent hosting a brand new design school, in the heart of San Marino Città. Vibrancy detects noise level and expresses it as a continuous dynamic flow of material. Perfect image of our daily academic life, always on the move"

PROTOTIPO



Prototipo a breve termine
Funzionamento + Front View
Girata "tappo"
qui poggia il materiale a riposo
EPS granulato
(o 1000 altre cose!)
lv ≈ 600 (?)
ZANZARIE METALLICA
Girata isolamento
Ventola del materiale
Supporto sospensione ventola (?)
Componentistica
① Riposo
② Movimento Rumore r
③ Movimento Rumore R
